

Chayan Banga

Faridabad, India | chayanbanga1978@gmail.com | +91-9718897258 | [LinkedIn](#) | [GitHub](#) | [Hugging Face](#)

PROFILE

Engineer with hands-on experience building and deploying intelligent systems — from fine-tuned language models to RAG pipelines and LLM-powered automation. Skilled across PyTorch, Hugging Face Transformers, LangGraph, FastAPI, and data workflows with Pandas and MySQL. Currently targeting ML Engineer, AI Automation, and Research Engineer roles.

EDUCATION

Master of Computer Applications (MCA)

Amity University, Noida

2025 – Present

Bachelor of Computer Applications (BCA)

Maharshi Dayanand University, Faridabad

Nov 2022 – May 2025

WORK EXPERIENCE

Python Developer Intern | Kogniti Minds Private Limited

Sep 2025 – Oct 2025

- Built a complete mini-CRM system from scratch — covering lead management, sales tracking, and automated Excel reporting used daily by the sales team.
- Developed an SMTP-based bulk email automation module with template management and logging — no third-party dependencies required.

Machine Learning Intern | Navodita Infotech

Apr 2026 – May 2026

- Completed internship focused on applied machine learning, building and evaluating supervised learning models using Python and scikit-learn.
- Gained hands-on experience with data preprocessing pipelines, model evaluation metrics, and deploying lightweight ML solutions.

AI/ML ops Intern | Accesco Living

Apr 2026 – Till Now

- Built and evaluated supervised learning models using Python and scikit-learn, covering the full pipeline from data preprocessing to deployment.
- Designed and optimized model evaluation workflows, improving pipeline reliability for lightweight ML solutions

SKILLS

ML & Deep Learning: Neural Networks, Backpropagation, Transformers, Fine-tuning, Transfer Learning, Attention Mechanisms, Zero-shot Multilingual Transfer, Text Classification

Optimization Techniques: LoRa, QLoRa, PEFT, Quantization (INT8/INT4, GPTQ, AWQ), Knowledge Distillation, Adapter Layers, Pruning

Prompt Engineering: Zero-shot, Few-shot, Chain-of-Thought, ReAct, RAG Prompting, Prompt Security, Instruction Tuning

Data Analysis: Pandas, NumPy, SQL, Power BI, Excel, EDA, Feature Engineering, Data Cleaning, Visualization

Frameworks: PyTorch, Scikit-learn, Hugging Face Transformers, Streamlit, LangGraph, FastAPI

Languages: Python, MYSQL, C, C++

Tools: Git/GitHub, Jupyter, VS Code, Google Colab, Kaggle, Hugging face

PROJECT EXPERIENCE

Multilingual Sentiment Analyzer

[Github](#) | [Live Demo](#)

mBERT · PyTorch · Streamlit Cloud · Hugging Face · NewsAPI

- Existing sentiment tools were English-only — so I fine-tuned mBERT on Yelp reviews using PyTorch, deployed live on Streamlit Cloud, and hit 93.79% training / 87.68% test accuracy with zero-shot transfer to 4 languages at ~80%.

Neural Network from Scratch — Digit Classifier

PyTorch · MNIST · MLP

- Wanted real understanding beyond APIs — so I built a 3-layer MLP from PyTorch primitives, diagnosed a dying ReLU, switched SGD to Adam, and hit ~97% on MNIST.

AutoStream AI Sales Agent

[Github](#) | [Live Demo](#)

LangGraph · Gemini 2.5 Flash · FastAPI · RAG

- Autonomous AI Agent for a SaaS platform with intent classification, RAG-powered responses, and multi-turn lead capture pipeline via LangGraph conditional routing. Production-deployed on Render.

CERTIFICATIONS

- Basics of AI Certification — Amity University
- Internship Completion Certificate — Kogniti Minds
- Internship Completion Certificate — Navodita Infotech
